Welcome

In 2021, the Butler County Elderly Services Program (ESP) continued its long history of playing a significant role in the well-being of our county’s older adults, supporting the choice of 4,307 residents to age in place in their homes.

In 2020, ESP became a lifeline to clients by providing meals, supplies and masks. When COVID vaccines became widely available in 2021, attention shifted to vaccinating older adults. Council on Aging (COA), ESP’s administrator and the Area Agency on Aging in Butler County, worked with the Ohio National Guard and other partners to operate vaccination clinics. COA also provided no cost transportation to vaccination appointments and developed a process, in partnership with local health departments, to vaccinate frail homebound individuals. We are grateful to the Ohio National Guard for their invaluable support.

I’m sure you have heard that the national home health aide shortage continues to impact our program. COA staff are always working on creative and innovative solutions to this challenge. For example, one solution was identifying and onboarding a new financial management service provider to make it easier for ESP clients to hire their own aide through the Consumer Directed Care option.

In addition, the aide shortage means our neighbors are providing more intensive and time-consuming care for their older loved ones – often on top of other responsibilities such as work and raising children. To be effective, it’s vitally important for caregivers to have back up support. As of 2021, a new respite care offering in COA’s Caregiver Support Program allows a care recipient a multi-day stay in an appropriate, safe facility, giving their caregiver a chance to recharge and manage their many responsibilities.

Launched in 2020 in Butler County, the USDA Senior Farmers’ Market Program celebrated its second year by more than doubling its participation. Through the program, 547 Butler County older adults received fresh, local produce for no out-of-pocket cost. This program supports local farmers too!

I’m happy to say there are even more ESP success stories to share. You’ll see some of them in this report; and please be sure to scan the QR code for more. We appreciate and count on your referrals and support of the ESP program.

Sincerely,
Katy Abbott, PhD, MGS
President, Butler County Elderly Services Program Advisory Council

What Is ESP?

The Elderly Services Program helps eligible county residents age 65 and older to remain safe and independent in their homes by providing help with certain activities of daily living (bathing, cleaning, cooking, transportation and more), filling gaps in care that may already be provided by family caregivers.

ESP offers flexible care to meet clients’ changing needs. Eligibility and care needs are determined by an in-home assessment and a professional care manager coordinates and monitors clients’ care. Income is not an eligibility factor for ESP, but some clients have a co-payment based on their income.

The program is operated by Council on Aging (COA) via a contract with Butler County Commissioners, who appoint a board to advise on program needs and policies. Provider agencies deliver ESP services under a contract with COA. ESP is a compassionate and cost-effective alternative to nursing home care. On average, it costs $290 per month to help an older adult stay in their home with services through ESP, compared to more than $6,000 per month for Medicaid nursing home care, funded by tax dollars.

What Is COA’s Role?

COA’s responsibilities for ESP in Butler County include: program development, provider management, data analysis and reporting; financial services and oversight; information technology; quality improvement; and community engagement. As a state-designated Area Agency on Aging, COA provided these additional services in 2021:

- 55,966 requests for information and referral fulfilled
- 1,326 individuals throughout COA’s service area were provided support to transition from one care setting to another
- $1.26 million in Title III funding allocated to local organizations for congregate meals, legal assistance, wellness education, caregiver support, transportation and other supportive services
- 2,025 Butler County residents received home- and community-based services through Medicaid-funded programs

ESP Is a Community Partnership

2021 Annual Report
Butler County ESP clients are caught in the middle: with income too high to qualify for Medicaid, but too low to pay for private in-home care. They need help with basic activities like personal care and transportation. Between raising a family and going to work, family members help as much as they can, but ESP fills in gaps in care so our older neighbors and loved ones can continue to live independently in their homes and communities. ESP is a program that benefits our entire community.

Success Stories

Butler County woman recovers from loss of leg with support of ESP

As Mona lay in the hospital confused and barely aware of her surroundings, her family rallied around her. Decisions had to be made quickly. For years, Mona had been beset by one health problem after another. That, plus the isolation brought by the COVID pandemic, had flattened her once bubbly personality. Now her life was in peril.

The problem was her left leg. She had had three surgeries over the years in an effort to correct inadequate circulation. She was often in pain, but in February of this year, it grew worse. Infection had set in. “She called me and I could tell something wasn’t right,” said Mona’s brother, Ralph. “She was slurring her words. When I went over, sure enough, she was way out of it, and her toes were totally black. I knew right away what it was.” (scan QR code for more)

New financial management services provider makes it easier for ESP clients to hire their own caregiver

As ESP’s administrator, COA contracts with organizations to deliver services to clients. Contracts are awarded through a competitive bidding process via requests for proposals (RFPs). The goal of the RFP process is to identify and contract with service providers who can offer the highest quality services at the lowest possible cost in order to serve as many older adults as possible with the available tax dollars.

In September, COA issued an RFP for Financial Management Services (FMS) in the Elderly Services Program. The FMS provider supports ESP clients who utilize the program’s consumer-directed care option to recruit and hire their own aides. In this case the ESP client or designated family member is the “employer” and the aide they hire is their “employee.” The FMS provider, on the client’s behalf, manages all the financial and payroll related responsibilities in addition to criminal background checks that go along with being an “employer.” (scan QR code for more)

Council on Aging helps older adults get COVID-19 vaccinations

Since February 2021, Council on Aging (COA) has played a key role in helping more than 3,000 area older adults get vaccinated against COVID-19, while helping countless others connect to information about the available vaccines.

When Ohio rolled out its statewide COVID-19 vaccination plan in February 2021, older adults were among the first eligible groups to receive a vaccination. However, older adults had difficulty getting vaccinated for two primary reasons: 1) there was not enough vaccine to meet the demand; and 2) most vaccine registration systems required use of a computer or smart phone to make an appointment – a barrier for many older adults.

There was also confusion about where older adults could go for assistance in navigating a fragmented vaccine system. (scan QR code for more)
